FY 27 Pipeline Review Provisional Operating Plan Recommendation

September 2026

Executive Summary

Provisional FY27 Planning Estimate

$92.5M

Based on stage-weighted planning assumptions, not measured historical rates

$162.7M	$70.7M	$114.3M
Total Submitted FY27 forward pipeline	Conservative Estimate for FY27	Optimistic Estimate for FY27

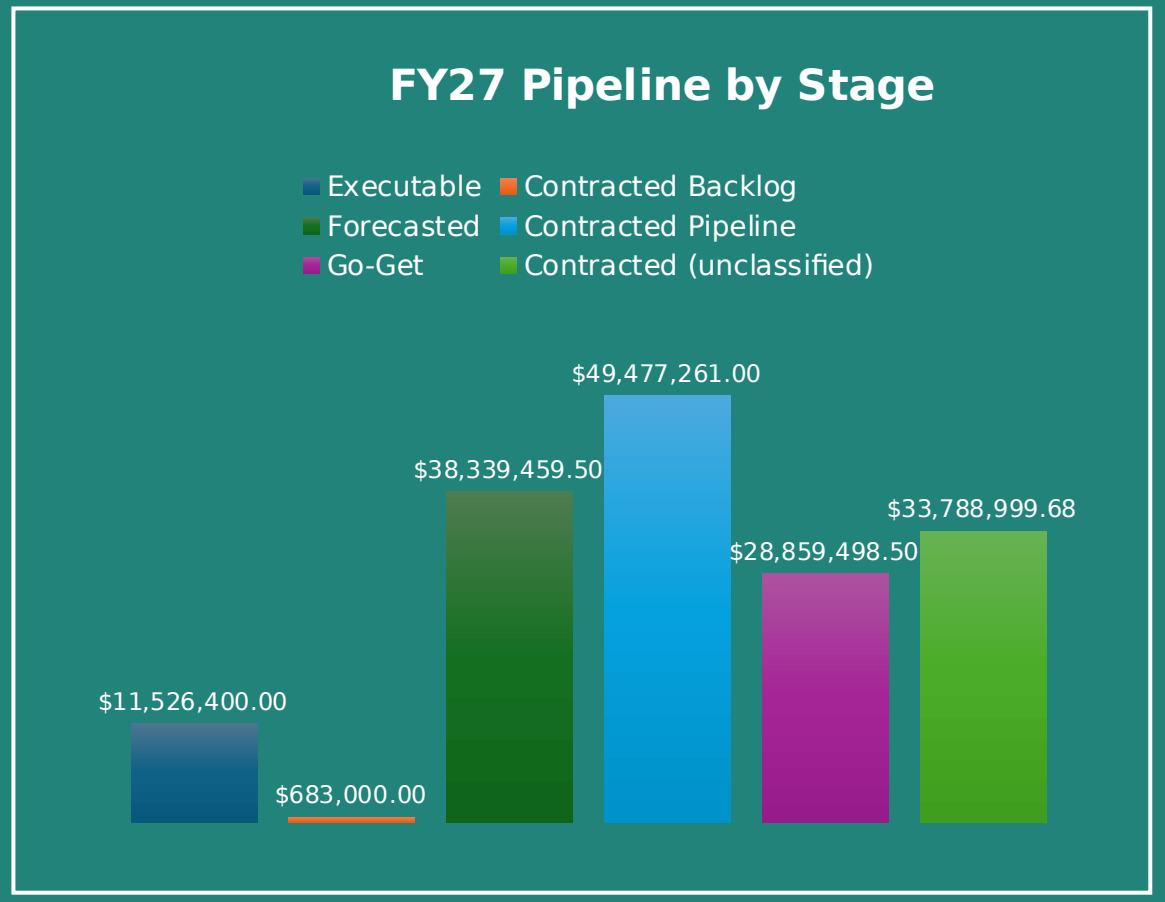

FY24 actual	FY25 actual	FY26 est.	FY27 est.
$159.8M	$149.5M	$136.7M	$92.5M
	−6.5%	−8.6%	−32%

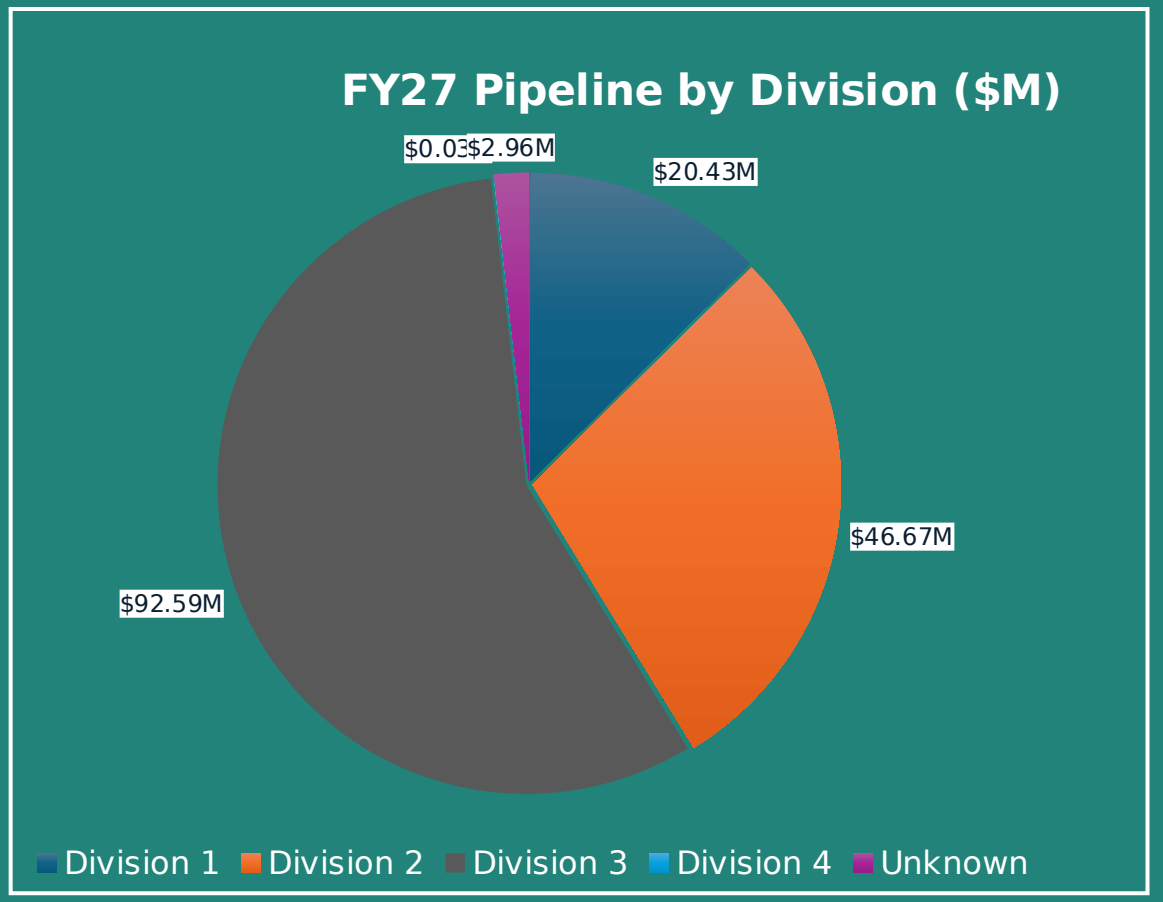

This is a working estimate from submitted pipeline data. Final approval depends on validating Division 4's submission, confirming the $33.8M unclassified bucket, and verifying the largest opportunity. Decline is mostly a data problem.

Separating FY27 Pipeline from Actuals and Duplicates

Description	Amount	Adjustment
Revenue as submitted by four divisions	**$635,968,267**	
Less: duplicate submissions removed		($6,379,506)
Revenue after cleaning	**$629,588,762**	
Less: FY24 and FY25 actuals		($309,318,943)
Less: FY26 actuals to date (Jan–Jun)		($72,438,675)
Less: FY27 records labelled YTD		($4,000,000)
Forward pipeline, FY26 and FY27	**$243,831,144**	
of which FY27	**$162,674,619**	

FY27 Pipeline by Stage and Divisions

Key Risks in the FY27 Pipeline

Division 3

$92.6M, 57% of FY27. Plan accuracy depends on one division.

Division 4

$31,100 vs $13.7M FY26 Pipeline. 92 missing project IDs. Likely incomplete.

Customer 14 / Proj 47

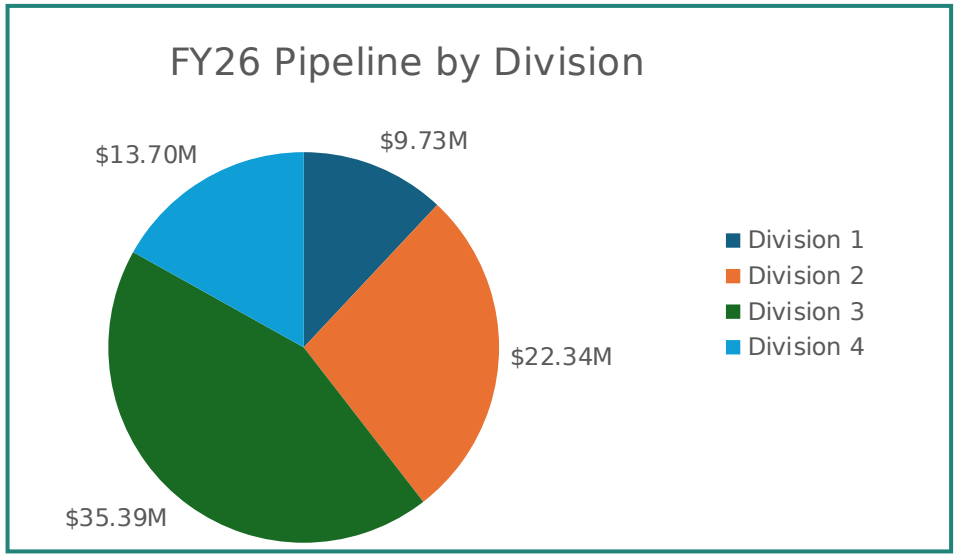

$33.8M (21% of FY27)

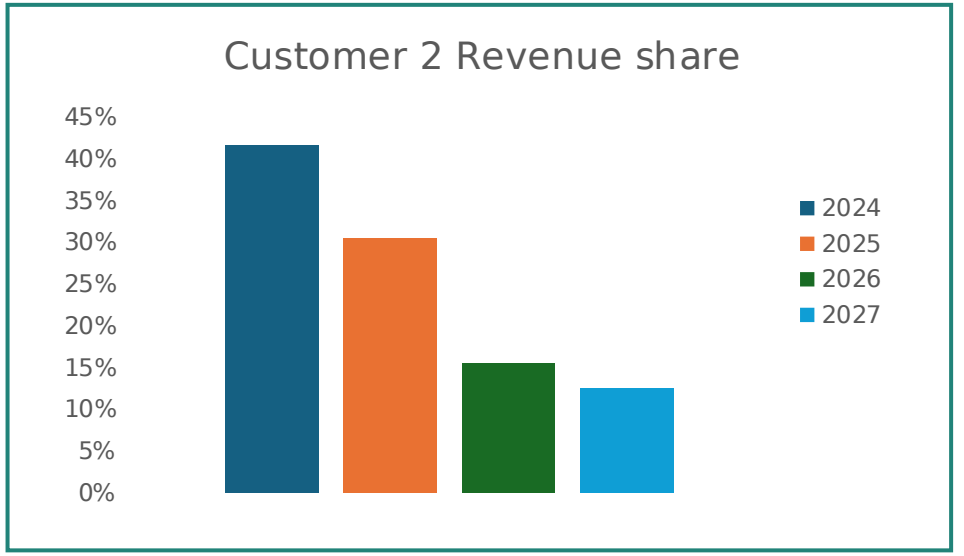

Top 4 Customers

67% of FY27 pipeline. High single-event risk.

Customer 2

Declining: 42% of FY24 → 30% FY25 → 13% FY27 pipeline.

Stage Weights and Planning Assumptions

Stage	PO/SOW issued	Scope certain	Timing certain	Base	Conservative	Upside
Executable	Yes	Yes	Yes	95%	90%	100%
Contracted Backlog	Yes	No	No	80%	70%	90%
Forecasted	No	High Confidence	High Confidence	70%	55%	85%
Contracted Pipeline	No	No	No	50%	35%	65%
Go-Get	No	No	No	20%	10%	30%
Contracted (Unclassified)	Not Stated	Not stated	Not stated	70%	55%	85%

Stage	Pipeline	Weight (Base)	Weighted
Executable	$11.5M	95%	$11.0M
Contracted Backlog	$0.7M	80%	$0.5M
Forecasted	$38.3M	70%	$26.8M
Contracted Pipeline	$49.5M	50%	$24.7M
Go-Get	$28.9M	20%	$5.8M
Contracted (Unclassified)	$33.8M	70%	$23.7M
Base Plan	**$162.7M**		**$92.5M**

Data Quality Assessment

Issue	Records	Impact	Treatment	If missed
Duplicate submissions	27	$6.4M	Removed	FY26 pipeline overstated by $6.4M
Missing project identifiers	148	No $ change	Flagged, retained	Project validation impossible
FY27 records labelled YTD	2	$4.0M	Excluded from base	Double-counted as actuals + pipeline
Quarter-month mismatches	7	$1.4M	Corrected	Quarterly totals misallocated
Negative YTD amounts	4	$1.3M	Retained	Actuals overstated by $1.3M
Unknown segment values	14	No $ change	Labelled Unknown	Segment analysis skewed

What this Data Can Answer, What It cannot, and What to Build

What the data can/cannot convey

Question	Can we answer it?
How much FY27 pipeline by stage?	Yes
How concentrated is it?	Yes
What is the conversion rate by stage?	No (needs periodic snapshots)
How long do deals sit in each stage?	No (no date fields)
Is revenue trending up or down?	Barely

Recommended KPIs

KPI	What it measures
Pipeline coverage ratio	Estimate pipeline vs plan target, monthly
Stage conversion and velocity	How fast deals advance and what % convert
Forecast accuracy	Compare prior weighted estimate to actual revenue delivered
Submission completeness	% of records with all required fields
Concentration risk	Revenue shared of top 5 deals and customers

To close the gaps above, adopt a standardised opportunity-level data model across all Divisions

Add this field	It unlocks
Opportunity ID	Track deals across snapshots
Stage (controlled list)	Eliminate spelling variants
Expected close quarter	Enable timing / slippage analysis
Date entered stage	Enable ageing analysis
Submission date	Enable period-over-period comparison

With quarterly snapshots using this model, Finance can calculate actual stage-to-close rates within 2–3 reporting cycles, replacing judgement-based weights with measured conversion rates.

Required Actions Before Plan Approval

Division 4	Complete FY27 resubmission. Current: $31K submitted, 92 missing project IDs.
All Divisions	Classify 34 unclassified Contracted records ($33.8M) into the five defined stages.
Division 3	Validate Customer 14 / Project 47 ($33.8M, 21% of FY27). Confirm scope and timing.
Finance	Confirm whether this pipeline is the complete FY27 revenue expectation.
Finance	Clarify Customer 2 decline (47% to 14% share). Incomplete submission or real trend?
Finance	Adopt the proposed data model and begin quarterly snapshots for FY28 planning.
